NC indicates that no counts are reported because there were less than fifty students initially in this category. The small size of these categories distorts the percentages and makes comparisons meaningless.

State averages from THECB are only calculated for first-time freshmen from two year colleges.

\* State averages for Fall to Spring retention are taken from the *Statewide Annual Data Profile for 1997* from THECB.

# State average for Fall to Fall first-time, full-time retention is reported in the *1996 Statistical Report* from THECB.
