2025-2026 Academic Year
South Texas College Dual Credit Programs
Textbook Adoption List

Dual Credit Programs Textbook Guidelines
The textbook information provided in this document applies to dual credit sections "S".

• South Texas College guidelines for the purchase and use of approved dual credit textbook adoptions are summarized here to facilitate communication between partners and to help ensure the availability of required course materials for dual credit students by the first class day.

• Dual credit textbook adoptions must follow South Texas College's Dual Credit Interlocal Agreement (IA) provisions, the guidelines in the Dual Credit Programs Instructional and Quality Standards Manual and STC Board Policy EDA: Instructional Resources – Instructional Material.

• According to the IA, College-approved textbooks purchased by the school district as required for a college course are allowed to be used for four (4) years. STC Program/Department Chairs may request a change of textbook earlier than four (4) years, if the textbook is for a technology-based course or with reasonable justification.

• Partnering high school sites should have documentation available showing when required course materials were purchased. The documentation enables schools to track the time period for allowed use and when textbooks are due to be replaced. Both partners want to avoid a school being asked to replace textbooks too soon after purchase and partner schools using textbooks beyond the allowed time period.

• When the Department of Dual Credit Programs is communicating with partner schools regarding adoptions, the respective STC department chair should be included in communications including the following:
- Information provided to a partner school for the purchase of required course materials
- Questions about whether course materials are due to be replaced
- Requesting an exception to the allowed time to use course materials after purchase
- Requesting an exception for the use of other than the STC-adopted textbook and required course materials

DEFINITIONS:
• **OER** - Open Educational Resource approved by STC Program/Department Chair for course as a teaching, learning, or research resource. Students are provided access to resource(s) via student's Blackboard Course. OER resources can be acquired at a low-cost or no cost depending the approved resources.
• **MindTap** - Students can read/listen on any device, learn and study the topics needing extra attention. Make flashcards to study for quizzes, highlight notes.
• **OpenStax** - Offers free college textbooks for students. Courses that use OpenStax are approved by STC Program/Department Chair and students are provided link to access textbook via student's Blackboard Course.
• **CNOWv2** - resource for accounting courses to help students understand challanging concepts, include real-world practice test, and homework assigments.
• **PAC** - Printed Access Codes - Enter Access Code to make product available
• **IAC** - Instant Access Codes - Product available immediately
• **Bundle** - Physical Text and PAC
• **ePack** - Bundle that includes 1 IAC that unlocks access to a digital product
• **Honorlock** - Effective Fall 2024, Respondus Lockdown Browser will no longer be used by students or faculty. Honorlock is the new application for all South Texas College online proctored exams. Honorlock is a browser extension that can be installed on Google Chrome. Honorlock is active when a student logs in to the exam and is inactive when they log out.

Dual Credit Programs Textbook Guidelines

• South Texas College guidelines for the purchase and use of approved dual credit textbook adoptions are summarized here to facilitate communication between partners and to help ensure the availability of required course materials for dual credit students by the first class day.

• **The textbook information provided in this document applies to dual credit sections "S".**

• Dual credit textbook adoptions must follow South Texas College's Dual Credit Interlocal Agreement (IA) provisions, the guidelines in the Dual Credit Programs Instructional and Quality Standards Manual and STC Board Policy EDA: Instructional Resources – Instructional Material.

• According to the IA, College-approved textbooks purchased by the school district as required for a college course are allowed to be used for four (4) years. STC Chairs may request a change of textbook earlier than four (4) years, if the textbook is for a technology-based course or with reasonable justification.

• Partnering high school sites should have documentation available showing when required course materials were purchased. The documentation enables schools to track the time period for allowed use and when textbooks are due to be replaced. Both partners want to avoid a school being asked to replace textbooks too soon after purchase and partner schools using textbooks beyond the allowed time period.

• When the Department of Dual Credit Programs is communicating with partner schools regarding adoptions, the respective STC department chair should be included in communications including the following:
- Information provided to a partner school for the purchase of required course materials
- Questions about whether course materials are due to be replaced
- Requesting an exception to the allowed time to use course materials after purchase
- Requesting an exception for the use of other than the STC-adopted textbook and required course materials

DEFINITIONS:
• OER - Open Educational Resource approved by STC Program/Department Chair for course as a teaching, learning, or research resource. Students are provided access to resource(s) via student's Blackboard Course.
• MindTap - Students can read/listen on any device, learn and study the topics needing extra attention. Make flashcards to study for quizzes, highlight notes.
• OpenStax - Offers free college textbooks for students. Courses that use OpenStax are approved by STC Program/Department Chair and students are provided link to access textbook via student's Blackboard Course.
• PAC - Printed Access Codes - Enter Access Code to make product available
• IAC - Instant Access Codes - Product available immediately
• Bundle - Physical Text and PAC
